

Solar Thermal / Water Reclamation

Grey-Water Recycling

Rain-Water Harvesting

Black-Water Treatment Systems

GENERAC®

Dear Valued Customers, Distributors, and Associates,

Grun-Sol Technologies Ltd is very excited to announce that we have entered into a strategic alliance agreement with SAGE Energy Inc., located in Windsor, NS. We have worked together on numerous projects in the past years and have been in talks for some time now regarding this partnership / alliance.

SAGE Energy is owned and operated by Rob Sedgwick, Red Seal journeyman electrician and Renewable Energy technician. SAGE Energy supports both renewable energy choices and sustainable ones. They specialize in installation and maintenance of renewable energy solutions for residential and commercial applications and with particularly strong skills and experience with Wind Turbines and Photovoltaic Solar Electric systems. SAGE also has extensive installation and maintenance experience with propane/natural gas generators, and they are a certified GENERAC Generator Sales and Service provider for NS and the Atlantic Provinces.

Grun-Sol Technologies continually strives to provide the best advice and customer service to our existing customers, and we want to give our new customers a unique and educational experience involving any investment in RE or Brac Water Reclamation technologies. With the alliance of SAGE Energy, we will accomplish this and greatly expand our ability to provide outstanding customer service and support. Our goal is to work in synergy - allowing our customers, suppliers and associates access to the best RE, Energy Efficiency and Water Reclamation design advice, products, and services in the Maritime Provinces.

Grun-Sol will now be focusing on our core skills and strengths which are Solar Thermal and Water Reclamation design as well as Energy Efficient products and installation. SAGE Energy will bring Solar Electric PV and Wind Turbine expertise into this mix, along with their well established Generac Generator product line and installation experience. Together, we will provide up-to-date and current RE information, expert design, qualified and industry certified installation, and most importantly excellent customer service in both New Brunswick and Nova Scotia. This alliance will also ensure we will have a unified voice and a presence both in NS and NB for future clients or Government incentive programs that may be forthcoming. This is a win-win for everyone. Have a prosperous and healthy New Year!
